Dr. Sameera Gupta, a physio - occupational therapist, specialist in sports medicine & weight loss management
Head of Dept. at Physio Slim Centre, a rehab & wellness centre at Sujay Hospital .

Lose upto 1 kg, 10 inches allover in one sitting or lose 3 inches on the Spot... be it tummy, thighs or any unwanted bulges.

These passive exercises alongwith a combination of active exercise and healthy diet plans are also ideal for persons suffering with medical problems like diabetes, hypertension, thyroid, low back pain and joint pain.

With Body Contouring Machines & Ultralipolysis: A Non-surgical, Non-invasive Fat Reduction method, the fastest way to lose inches instantly.

It gives break from traditional surgical lipo with the same results. A scientific method to cut down unwanted fats, unsightly fat deposits and body circumference in men & women by cavitation of the triglycerides which are rapidly, naturally metabolized.

How long does it take?

Dr. Sameera: A typical Ultrasonic Lipolysis session takes 2.5 hours.

So is there any surgery involved?

Dr. Sameera: Ultrasonic Lipolysis is a completely non-surgical procedure. No pain and incision, no anaesthesia, or injections.

How safe is it?

Dr. Sameera: Ultrasonic Lipolysis is completely safe. There are absolutely no side effects. And you can expect to lose upto 1 kg & 10 inches permanently around your abdomen, hips or thighs, whichever area the patient chooses to target.

Is the fat loss permanent?

Dr. Sameera: Yes, it is. Unlike dieting and exercising which only reduces the size of the fat cells, this procedure actually reduces the number of fat cells in your body. Fat cells do not increase in number after maturity, so the loss is permanent.

Turnaround Now & Permanently lose those inches and weight with **Treatments starting at Rs 1999/-**
